

K 1340

Kids

This stackable children's chair shows us how Pop furniture, despite all its brilliance and fantasy, is first and foremost functional and ergonomic. In the early 1950s, designers Richard Sapper and Marco Zanuso began to explore the possibilities offered by plastic. The **K1340** chair, designed for children, is the first in the world to be built entirely from plastic. It is made of polyethylene, an easy and unbreakable material. In 1964, this chair receives the Compasso d'Oro design award. The jury recognises the designers' ability to give children the opportunity to easily and safely take possession of their spaces.

Author·s	Richard Sapper, Marco Zanuso
Year of creation	1960
Editor	Kartell
Typology	Chair
Materials	LDPE

Colors	Red
Dimensions	49.8 x 26.5 x 26.5 cm
Inventory number	PLAS.0675
Status	Not exhibited
