

Floris

Günther Beltzig explores the technical and formal possibilities of plastic to create a chair that is both comfortable and ergonomic. The user has great freedom of movement because the points of contact between the object and the body are minimal. The back of the chair, which is a narrow support for the neck and pelvis, has a continuous structural groove providing a ventilation channel. After creating a prototype in fibreglass reinforced polyester, the chair was presented at the International Furniture Fair in Cologne in 1968. Due to the complexity of the production process, in 1976 less than 60 copies will have been produced. In 1992, the owner of a Munich gallery, Wolfgang Mauer reissues the **Floris** in a limited edition, signed by Beltzig.

Author·s	Günther Beltzig
Year of creation	1967
Editor	Brüder Beltzig Design (BBD)
Typology	Chair
Materials	GRP
Colors	Orange
Dimensions	106.5 x 36.5 x 63 cm
Inventory number	PLAS.0229

Status

Not exhibited
