

Mammut

Kids

Designers don't just think about grown-ups. Sitting properly is not just an adult privilege. The furniture giant, IKEA, has also taken on the complex task of re-appropriating the chair. Together with **Mammut**, designers Morten Kjelstrup and Allan Ostgaard have created this furniture series straight out of the world of cartoons. This chair is designed for children and combines safety and robustness. It is very light, can be moved easily and is also suitable for outdoor use.
